

Addendum. Interim COVID-19 vaccination coverage in the EU/EEA during the 2023–24 season campaigns – Italy and Sweden

This addendum presents additional COVID-19 vaccination coverage data reported by Italy and Sweden that was not included in the original surveillance report '[Interim COVID-19 vaccination coverage in the EU/EEA during the 2023–24 season campaigns](#)' (Table 1, Figures 1–2). The figures present the originally reported data, as well as the new data from Italy and Sweden.

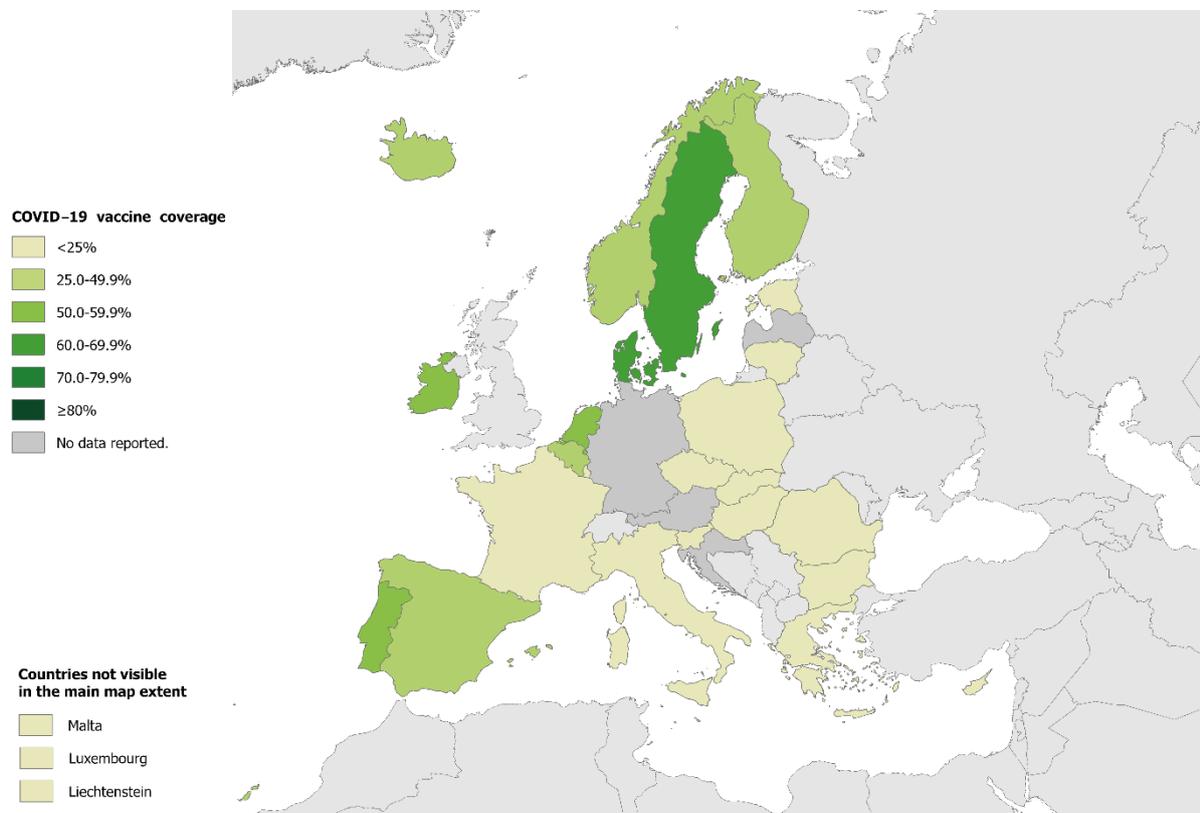

Table 1. COVID-19 vaccine coverage by target group, two EU/EEA countries, 1 September 2023 to 31 December 2023

Country	Aged 60–69 years	Aged 70–79 years	Aged 80 years and above	Healthcare workers	Individuals with chronic conditions	Pregnant women
Italy	5.3%	10.1%	13.5%	NDR	NDR	NDR
Sweden ^a	44.8%	70.7%	74.0%	NDR	NDR	NDR

NDR: no data reported

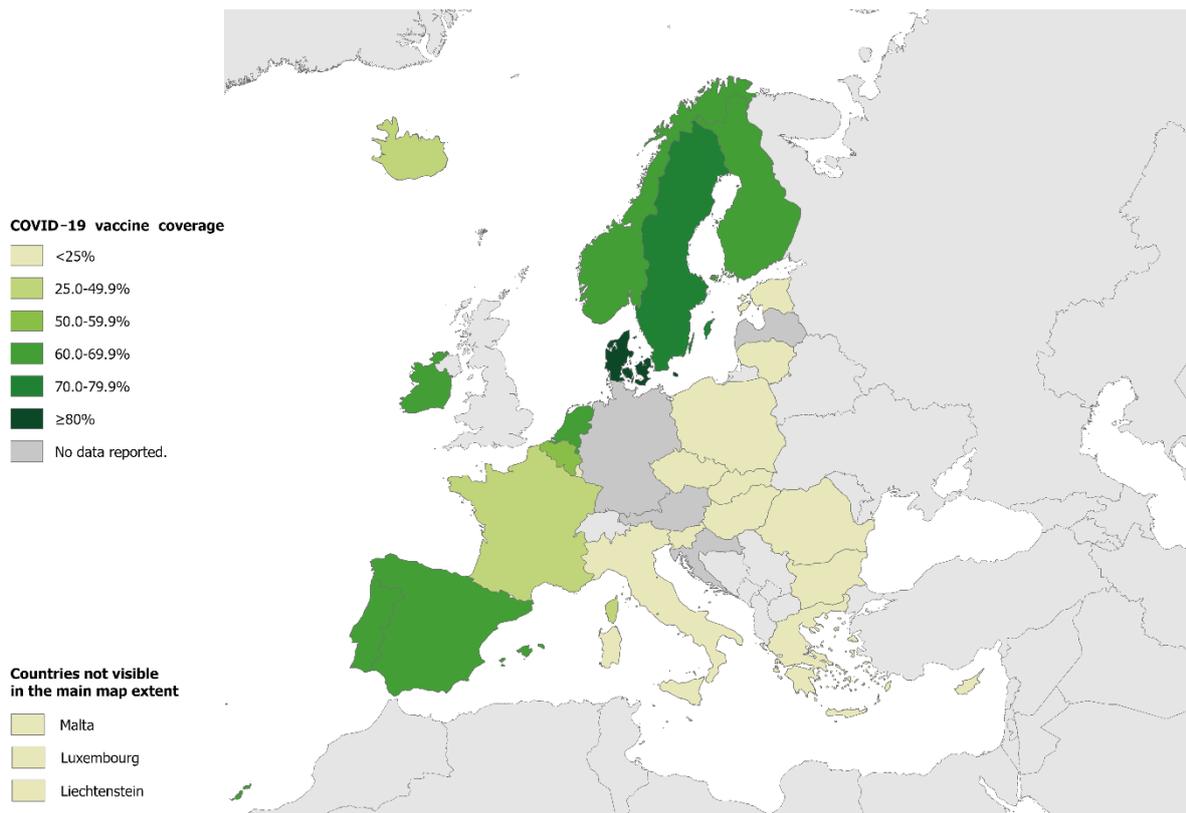

^a COVID-19 vaccine is only recommended in people aged 65 years and above. Therefore, the vaccination coverage in the 60–69 years age group needs to be interpreted with caution.
